

Guest Lecture

The Department of Electronics & Communication Engineering organized an Industry Guest Lecture on “Drone Technology & Job Opportunities” to provide students with insights into emerging technologies and career prospects in the drone industry. The expert speaker explained the fundamentals of drone systems, applications in agriculture, surveillance, mapping, defense, and delivery services, along with recent advancements in UAV technology.

The session also highlighted various career opportunities available in the fields of drone design, embedded systems, IoT, communication systems, and data analysis. Students gained valuable knowledge about industry requirements, skill development, certification courses, and startup opportunities in the rapidly growing drone sector.

Venue of Event – Room No. 119 Block-2
